Before knowing about cloud ERP , You should know the difference between cloud ERP and on-premise ERP. Cloud ERP is similar to on premise ERP , but the one thing that differentiates this software is that the system employs cloud computing ; therefore , the user can access the ERP system through the internet . Mainly known as SaaS model , which means the system can be available on a subscription basis and does not require infrastructure. Cloud ERP software is cost-efficient and easy to implement compared to On-premise ERP system and it increases security , now-a-days ensuring data security is important for every business . With cloud ERP facility the user can access the information and data remotely through the internet from anywhere at any time , there will be no issues accessing a cloud infrastructure for multinationals with remote locations. connectERP is a cloud based ERP system designed to meet the growing needs of the organization of all sizes . With it highly adaptable , flexible and easy to implement features make it one of the best cloud-based ERP software in the market. connectERP provides a true cloud experience , offers a features can be accessed on the internet without the need for further user-specific software installation or software licensing , without any external application
